Tactic Advanced

RT Software's advanced level sports analysis solution
Tactic Advanced

Easy to use, cost-effective and powerful 3D telestration for Academies, Scouting Departments, Clubs, Federations, Colleges, Universities, Analysts and Coaches who want to take their analysis to the next level.

With manual keyframing, graphics can track players in the video, allowing you to follow them. Keep graphics on the surface and insert moving logos for highlights reels and create visually stunning analysis. Tactic Advanced comes with optional AI Player Detect feature (hardware requirements apply) to automate keyframing, using our industry-leading Artificial Intelligence model, the most accurate and consistent in the market.

You can use your existing laptop to run Tactic Advanced; no specialist hardware is required so you can be up and running in no time, it's that easy.

With no pitch, court or line calibration required, graphics can be easily placed and are automatically keyed to produce professional results with minimal effort. With in-application tagging now available, you can use Tactic as an all-in-one analysis tool, or in conjunction with different providers!

Buying Tactic Advanced is easy too. RT Software offers monthly, quarterly and annual subscriptions subscriptions, which are available in the online store.

Virtually No Learning Curve

It really is that easy to use. The intuitive nature of Tactic means that it can be used straight away. For those who want to become expert users, Tactic provides video tutorials covering all its features.

Interactive Graphics

With our innovative presenter function, you can add graphics live using a touchscreen or a tablet, engaging your players and creating an interactive learning environment.

Coach Anywhere

With a simple export procedure, analysis sequences with all animations can be exported as a clip in any standard format to be replayed anywhere, laptop, tablet or phone.

Use the Virtual Stadium

Our virtual stadium allows you to build animations from scratch. Recreate game scenarios or create training exercises using any of the tools available for video along with virtual goals and balls.

Options Comparison

		Lite	Advanced	Pro	Scout
3D Tools	Matching camera position and angle to add 'on-pitch' graphics	✅	✅	✅	✅
Keying	Chroma keying (with auto function) and segment keying	✅	✅	✅	✅
Timeline	Advanced control of the timing of events within an analysis sequence	❌	✅	✅	✅
Virtual Stadium	A range of virtual stadiums for various sports are available	✅	✅	✅	❌
Presenter Interface/Tablet Control	The second screen allows the presenter to interact using a touch screen or a tablet	✅	✅	✅	❌
Save, Recall and Share Analysis Files	Easily save and load analysis files on any device	✅	✅	✅	✅
Camera Tracking	Track camera movement with one click and stay anchored to a position	❌	✅	✅	✅
AI Player Detect	Player detection allows the automatic tracking of players with easy corrections	❌	Optional	✅	Optional
Virtual Players	Explain tactical movements by adding male or female virtual players on the field	❌	❌	✅	❌
Metrics	Distance, run distance, speed, and angle graphics	❌	❌	✅	❌
AI Pitch Calibration	A field detection feature that allows users to calibrate a pitch with one click	❌	❌	✅	❌

Tagging	Cut the game clips with the tags you create	❌	✅	✅	✅
Available for Mac and Windows	Supports the two major operating systems	✅	✅	✅	✅

Multi-licence and multi-year discounts are available

Monthly, quarterly and half-year subscriptions are available in our online store.

ABOUT RT SOFTWARE

RT Software is an established graphics solutions company that has been working with leading broadcasters, such as the BBC, Sky Sports, TNT Sports, ITV, ESPN, Fox and many others, since 2004. What defines us is our ability to add graphics to video clips in order to highlight action or explain the gameplay.

Our products for the sports professionals market have evolved from the original top-end systems employed on air to much easier-to-use analysis tools, including powerful data visualisation solutions for recruitment and team management.

We are proud to have worked alongside some of the biggest names in the professional sports world to create these tools.

We have developed our Tactic suite of products (Lite, Advanced, Pro and Scout) to cater to the needs of every level of coaching and performance analysis – from amateur to the highest professional level.

"Using Tactic Advanced during the AFCON 2022 was a big help for our team. Players became more aware of their role in the squad and positively influenced the success rate of our game strategy. Highly recommend Tactic!"

Noureddine Bouachera
Assistant Coach
