

# Tactic Scout

RT Software's all-in-one sports analysis solution

# Tactic Scout

Tactic Scout is the easy-to-use, cost-effective but powerful all-in-one solution that is ideal for academies, fast-paced indoor and outdoor sports, colleges, universities, and scouting and recruitment departments.

Tag the game using our customisable tagging templates and telestrate to highlight players and select the clips to be sent to players and coaches. With all of this in a single application, the workflow is seamless, quick and easy to use!

With no virtual stadium, league packages or presenter interface, the simplified workflow means you can produce visually stunning analysis with no hassle and a quick turnround. Easily share analysis among different coaches or analysts, thereby allowing multiple people to contribute.

You can use your existing laptop to run Tactic Scout; no specialist hardware is required. You can be up and running in no time – it's that easy.

Tactic Scout works with a range of sports and different video types, from team sports (e.g., football, basketball and hockey) to individual sports (e.g., tennis).

Buying Tactic Scout is easy too. RT Software offers annual subscriptions, which are available in the [online store](#).

## Virtually No Learning Curve

It really is that easy to use. The intuitive nature of Tactic means that it can be used straight away. For those who want to become expert users, Tactic provides video tutorials covering all its features.

## Optional Player Detect

Leverage our innovative AI player detect feature to speed up your workflow. Our market-leading AI technology identifies and tracks players on-screen to create detailed analyses.

## Simple Tagging

Create tag projects with customisable tagging windows to add graphics to tagging and telestration in a single application.

## Share Analysis

Make teamwork easy. Collaborate with coaches, analysts and scouts by sharing your analysis with them. Work together more smoothly, share ideas and understand the game plan better.

# Options Comparison

		Lite	Advanced	Pro	Scout
<b>3D Tools</b>	Matching camera position and angle to add 'on-pitch' graphics	✓	✓	✓	✓
<b>Keying</b>	Chroma keying (with auto function) and segment keying	✓	✓	✓	✓
<b>Timeline</b>	Advanced control of the timing of events within an analysis sequence	✗	✓	✓	✓
<b>Virtual Stadium</b>	A range of virtual stadiums for various sports is available within the software	✓	✓	✓	✗
<b>Presenter Interface/Tablet Control</b>	The second screen allows the presenter to interact using a touch screen or a tablet	✓	✓	✓	✗
<b>Save, Recall and Share Analysis Files</b>	Easily save and load analysis files on any device	✓	✓	✓	✓
<b>Camera Tracking</b>	Track camera movement with one click and stay anchored to a position	✗	✓	✓	✓
<b>AI Player Detect</b>	Player detection allows the automatic tracking of players with easy corrections	✗	Optional	✓	Optional
<b>Virtual Players</b>	Explain tactical movements by adding male or female virtual players on the field	✗	✗	✓	✗
<b>Metrics</b>	Distance, run distance, speed, and angle graphics	✗	✗	✓	✗

## ABOUT RT SOFTWARE

RT Software is an established graphics solutions company that has been working with leading broadcasters, such as the BBC, Sky Sports, TNT Sports, ITV, ESPN, Fox and many others, since 2004. What defines us is our ability to add graphics to video clips in order to highlight action or explain the gameplay.

Our products for the sports professionals market have evolved from the original top-end systems employed on air to much easier-to-use analysis tools, including powerful data visualisation solutions for recruitment and team management.

We are proud to have worked alongside some of the biggest names in the professional sports world to create these tools.

We have developed our Tactic suite of products (Lite, Advanced, Pro and Scout) to cater to the needs of every level of coaching and performance analysis – from amateur to the highest professional level.

*“Tactic Scout has allowed us to create insightful analysis quickly and easily! It allows us to combine our tagging and broadcast quality graphics in a single, affordable application which has had a major impact on our game.”*
